Summary

10 years in infrastructure, from front-line hosting support to architecting two datacenters. I run the infrastructure behind hundreds of banking websites at 99.99%: security, compliance, failover, and the automation, end to end. And I build the tooling in Go and Python.

Experience

[S] Sr. Systems Architect and Director of IT Operations

org: BankSITE® Services, Scottsdale, Arizona dates: Nov 2021 - Present

Technical lead for the infrastructure behind hundreds of banking websites, across a primary datacenter and a disaster-recovery hot site.

- Hold a 99.99% uptime target with BGP failover between two datacenters
- Run HAProxy Enterprise load balancing and WAF, with rate limiting and bot mitigation
- Built the infrastructure management platform (Django, React, PostgreSQL) the team runs daily
- Designed a Go API over a MariaDB source-of-truth schema used by internal and production services
- Own PCI-DSS compliance scanning and remediation; report to the CEO and mentor the IT team

[A] Linux Engineer

org: Caris Life Sciences, Phoenix, Arizona dates: Oct 2019 - May 2021

Linux engineering and DevOps for a life-sciences company, alongside independent Linux administration contracts.

- Streamlined deployment, automation, and integration with Ansible and Jenkins
- Replaced manual server setup with repeatable automation
- Independent Linux administrator contracts, Sep 2019 to Aug 2021

[B] Systems Administrator

org: Endurance International Group, Phoenix, Arizona dates: Feb 2018 - Aug 2019

Administered VPS, dedicated, and shared servers on cPanel and CentOS 6/7, plus self-managed hosts on KVM-OpenStack and OpenVZ.

- Kept a large fleet of customer servers patched, secured, and running
- Wrote Bash tooling to speed up routine server administration

[C] T3 Tech Support

org: Endurance International Group, Phoenix, Arizona dates: Sep 2017 - Feb 2018

The escalation point for shared, VPS, and dedicated hosting support.

- Resolved issues escalated by upper management and the legal team
- Closed the cases other support tiers couldn't

[D] Professional Services Engineer

org: Endurance International Group, Phoenix, Arizona dates: Feb 2017 - Sep 2017

Delivered paid engineering work across every hosting brand in the company.

- Migrated websites and mailboxes between servers and providers
- Built custom PHP forms, code insertions, and third-party installs

[E+] Web Concierge (WP Live)

org: Endurance International Group, Phoenix, Arizona dates: Sep 2016 - Feb 2017

Taught customers to build their own sites on WordPress, Joomla, Drupal, and Weebly as a paid one-on-one service.

- Ran live build sessions and managed my own appointment schedule
- Turned non-technical customers into confident site owners

[E] T1 Tech Support

org: Endurance International Group, Phoenix, Arizona dates: Jun 2016 - Sep 2016

Front-line support for customers on shared, VPS, and dedicated hosting.

- Troubleshoot websites, email, databases, and DNS on live customer servers
- Traced mail delivery problems through Splunk logs

Skills

Load balancing and high availability:

HAProxy Enterprise and OSS, WAF, Rate limiting and bot mitigation, Keepalived (VRRP), BGP failover

Virtualization and storage:

Proxmox VE, Proxmox Backup Server, Ceph, Synology, HPE iLO

Network and security:

FortiGate, pfSense, Arista, WireGuard, Wazuh, FreeIPA and LDAP

Automation and code:

Ansible, Jenkins, GitHub Actions, Go, Python, Bash, Django

Containers and data:

Docker, Kubernetes, MariaDB Galera, PostgreSQL, PgBouncer

Observability: Grafana, Prometheus, SensusGo, ELK, LibreNMS

Linux and web: Rocky Linux, Debian, Apache, Nginx, PHP, WordPress fleets

Compliance: PCI-DSS, HIPAA

Education

Self-taught through books, online courses, and 10 years of running production systems.
